STALLED PROJECTS

Project Name	Location	Description of activities	Reasons for stalling
Kipsotet Water Project	Kipchimchim ward	Spring protection,; construction collection sump ,pump house, risingmain, masonry storage tank and distribution pipeline; power supply to the pump house; purchase and installation of pump set	The intended supply area was later on served by KEWASCO pipeline. The masonry tank already constructed will be incorporated to KEWASCO infrastructure.
Momoniat Water Project	Chepseon ward	Construction of masonry tank and distribution pipeline	The yield of the borehole has reduced over time.
Kipkobob Water Project	Chemosot ward	Fabrication and installation of Turbine; procurement and Installation of a Pump; Construction of Rising Main, Masonry Storage Tank, and distribution pipeline	Initially funded by CDF. The works would not completed by the allocation. The project lies within the supply area of Tilwasco and can be served with treated water from there pipeline
Kibugat water project	Tebesonik ward	Construction of intake channel, power house, rising Main and distribution pipeline; fabrication of a water driven pumping unit; purchase and installation of elevated plastic tanks	Initially funded by the defunct County Council of Bureti. The allocation would not complete the works.
Kaptendon Borehole Water Project	Cheboin	Drilling and Equipping of Borehole; Construction and Electrification of Pump House; Rising Main; Elevated Storage Tank ;Distribution pipeline; and Fencing	The yield of the borehole was uneconomical hence there was no need to continue undertaking the execution of other components of the project
Tebeswet Borehole Water Project	Chemosot	Drilling and Equipping of Borehole; Construction and Electrification of Pump House; Rising Main; Elevated Storage Tank ;Distribution pipeline; and Fencing	The yield of the borehole was uneconomical hence there was no need to continue undertaking the execution of other components of the project
Tebesonik-Kibolgong-siongi Water Project	Tebesonik Ward	Spring protection; construction of rising main, masonry tanks, water kiosks and main distribution pipelines.	The project was funded by Community Development Trust Fund (CDTF). After implementation of some components of the project, the upstream and downstream communities did not agree on sharing of the water resource. Alternative water supply sources have been explored and are in use
Chepngetuny Water Project	Seretut/Cheptororiet Ward	Spring protection; construction of sump, rising main and distribution pipeline; purchase and installatio0n of solar panel, pump set and elevated Plastic tanks	The Yield of the spring has deteriorated and is no longer economical to pump water from the spring. This happened when a nearby tree was cut down
